

Adelphia Powerlink in Baldwin Park is highly overpriced for their service. The cable system is non docsis so you are forced to pay the modem lease fee, there is no choice. The speeds are very unreliable and slow. Upload is 128kilobits per second which is sub-par for their high monthly rate. It is around \$56 a month, with the no cable tv fee and modem lease fee. They have raised the price since I first subscribed and there has been no sign of improved service or added benefit to my connection since they have raised the monthly subscription rate. It is a slap in the face to be charged more for not subscribing to their disgraceful cable tv offering and having such low quality, slow internet connection they call broadband that seems more like slow-overpriced-band.
